SUBJECT: Air War College Address

After talking with our contact at the Air War College, we've learned that Mr. McMahon's audience will have Top Secret clearances. They have also requested that he address the following topics if possible: CIA assistance to the Iranian hostages, terrorism, and Soviet active measures, future satellite and reconnaissance systems, Central America. We are going to go ahead and see what information we can gather on these issues. I think this will add the necessary depth to an introductory discussion on the intelligence process as given to you in the Army War College speech.
